

## Accounting for your fixed assets before they become fixed assets.

### We'll help you piece it together

To get the most out of your fixed assets, you have to account for everything, including fixed assets before they even become fixed assets. Think construction in progress: projects being built, upgraded, renovated, or accumulated prior to being put in service, such as multicomponent equipment, machinery upgrades, and building renovations.

Sage Fixed Assets—Planning is designed to do just that, and it allows you to manage as many projects as you need, regardless of the type or size. And when the assets are ready for use, they can be easily created in Sage Fixed Assets—Depreciation.

To help you easily manage and report on your construction in progress projects, Sage Fixed Assets—Planning has multiple levels of detail tracking including over 45 user-defined fields, as well numerous built-in reports such as project status and actual vs. budget variance. In addition, you can easily manage both capitalized and expensed assets and get key project information at a glance with "Project Snapshot."

Line	Description	Status	Type	GL/CP Acct No	Start Date	End Date	Last Date	Original Budget	Actual	% of Budget

#### Sage Fixed Assets—Reporting

Create an endless variety of custom reports, including charts, graphs, and advanced formatting options.

#### Sage Fixed Assets—Services

Get up and running quickly with customized inventory and professional services as well as expert, hands-on training.

# Sage Fixed Assets—Planning

## Manage your fixed assets before they become fixed assets

- Track all of your project details including status, contacts, notes, and all the financials—plus monitor both physical and financial completion of projects.
- Customize fields to your organization's needs with over 45 user-defined fields covering multiple levels of detail.
- Create custom access profiles with built-in security settings for specific product features and projects.
- Look at your organization across all projects at the project, line-item, and transaction level as well as at-a-glance status updates with built-in reports.
- Handle expenses easily with the ability to copy, move, and split line items.
- Tie project balances to your general ledger with point-in-time reporting.
- Import invoices and other purchasing information from your Accounts Payable system.
- Integrate seamlessly with the entire family of Sage Fixed Assets management solutions including the ability to easily create new fixed assets—even those with multiple assets from a single line item—in Sage Fixed Assets—Depreciation upon project complete.

## Sage Fixed Assets: We have you covered

Whether you're reporting to senior management, a government agency, auditors, donors and executive boards, or the IRS, you're accountable for the status and value of your organization's many fixed assets. Those assets can take the form of buildings, machinery, computers and other electronic equipment, office furnishings, even assets you build. Accurately tracking their varied lifecycles can be a daunting task—especially when there's so much at stake. Sage Fixed Assets can help.
