Industry-Leading Citrix Technology with the Best Security and Reliability Available
We use the very latest Citrix XenApp 7.6 technology with 256-bit encryption to provide our users with an experience that is both reliable and secure.

Automated Offsite Backups
All of your data on our system is backed up onsite and offsite once per day. Daily backups are available for 30 days.

Secure SSAE16 SOC II Datacenters.
Our systems are located in a secure SSAE16 facilities with natural and human disasters in mind. The facilities offer reliable connectivity, fast connection speeds, and virtually no downtime. We selected our data centers because their services, values, and expectations for high quality service are synonymous to the values we have at Swizznet. With our platinum packages, all systems are mirrored to a secondary SSAE16 data center in a geographically diverse location for true enterprise-grade disaster recovery and business continuity.

Redundant Firewalls
We run top-of-the-line firewall hardware, backed by a second tier. It there's ever problem with a firewall, another one immediately takes its place.

Encrypted SSL Gateway and PCI compliant
Our entire Swizznet system is covered by Site Safe SSL certification with a $1,000,000 user guarantee. We're PCI-compliant so you can safely process credit cards. Every month, we conduct port scanning, certified by Coalfire, to identify potential risks and ensure our highest safety levels are as good or better than online banking standards.

About Infoman

Sage is known worldwide as a great line of business software. It's even greater when implemented correctly for your organization's unique needs – by Infoman. Infoman, Inc. is a Sage Solution Provider, Development Partner, and Authorized Training Partner. We have been involved with Sage for over 20 years and are the Pacific Northwest's Sage experts in solution design, customization, training and ongoing support. For the life of your business — from start-up through years of successful growth — we are always here for you.

Since 1986, INFOMAN has completed hundreds of implementation projects, combining software knowledge with business acumen. All of our on-staff consultants have extensive backgrounds in the real business world, using automation to achieve bottom-line results. Our client base is diverse, including manufacturing, distribution, service, retail and nonprofit organizations, and we pride ourselves on maintaining client relationships that withstand the test of time.
